Location Agreements – Advice Note to Producers

Thank you for choosing to film with us.

As custodians of Britain's rail infrastructure, our primary focus is on operating, maintaining, and developing the nation's railway for the benefit of passengers, freight, and future generations.

Many of our spaces are unique and world-renowned, and our growing popularity with filmmakers only underlines their value. In response to screen industry feedback, we're working hard to unlock a greater range and diversity of locations for use, although this does come at a time of rising demand.

In order to provide you with an enhanced service, we're simplifying some of our processes, including our approach to location agreements, which were often subject to lengthy, complex and ultimately unnecessary contractual negotiation.

Therefore, and in line with many of the UK's premier locations, we have authored a new standardised location agreement which all productions will be required to use, negating the need for further negotiation. This will apply to all productions as of this date and will supersede all previous agreements issued.

Rest assured, the revised contract has been extensively researched and retains all the necessary clauses and provisions that productions require and value. Additionally, the agreement has been independently reviewed and verified by a leading media industry law firm, so we're confident it will meet your needs. As with all processes, we'll keep it under review and welcome feedback for future updates.

With thanks.
